Create Approval Process Using Zoho Creator

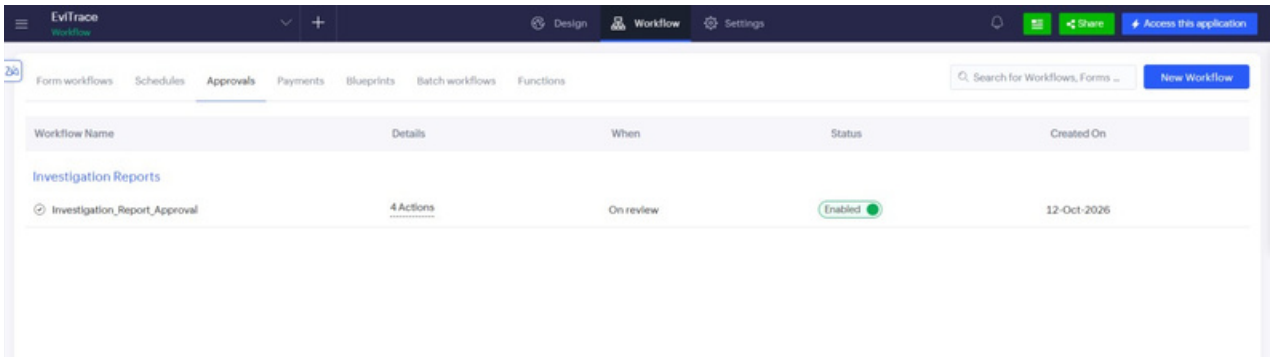

Aim

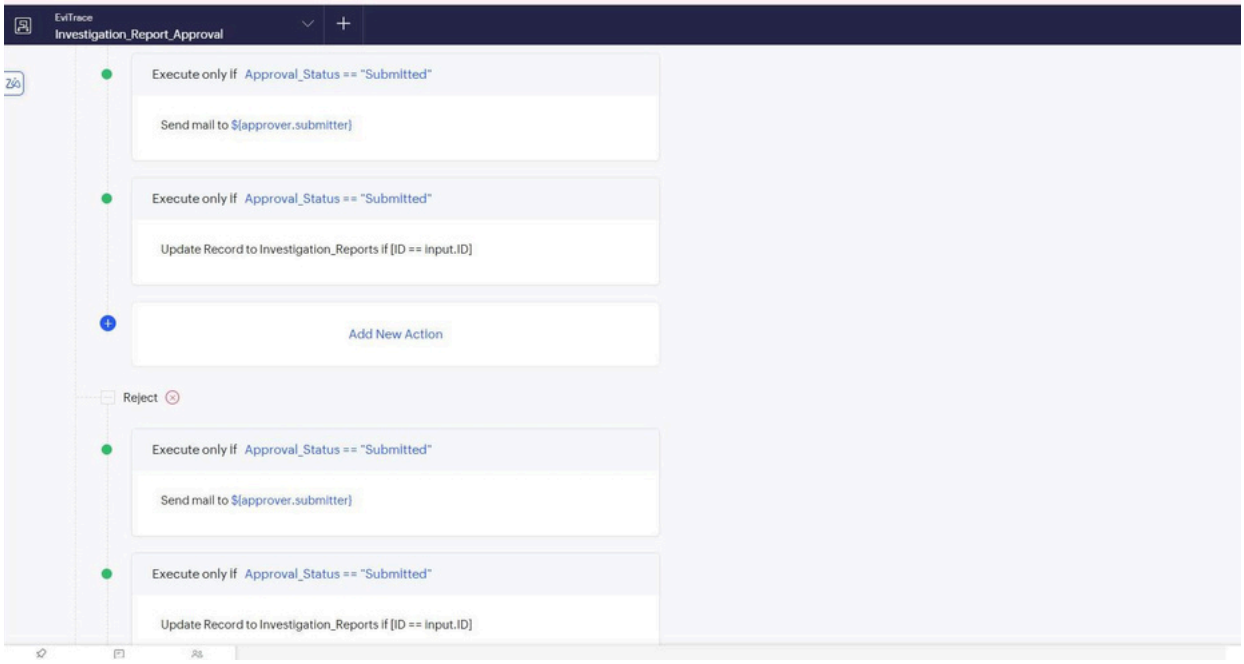

To implement an approval process in Zoho Creator for reviewing and approving investigation reports in the EviTrace application.

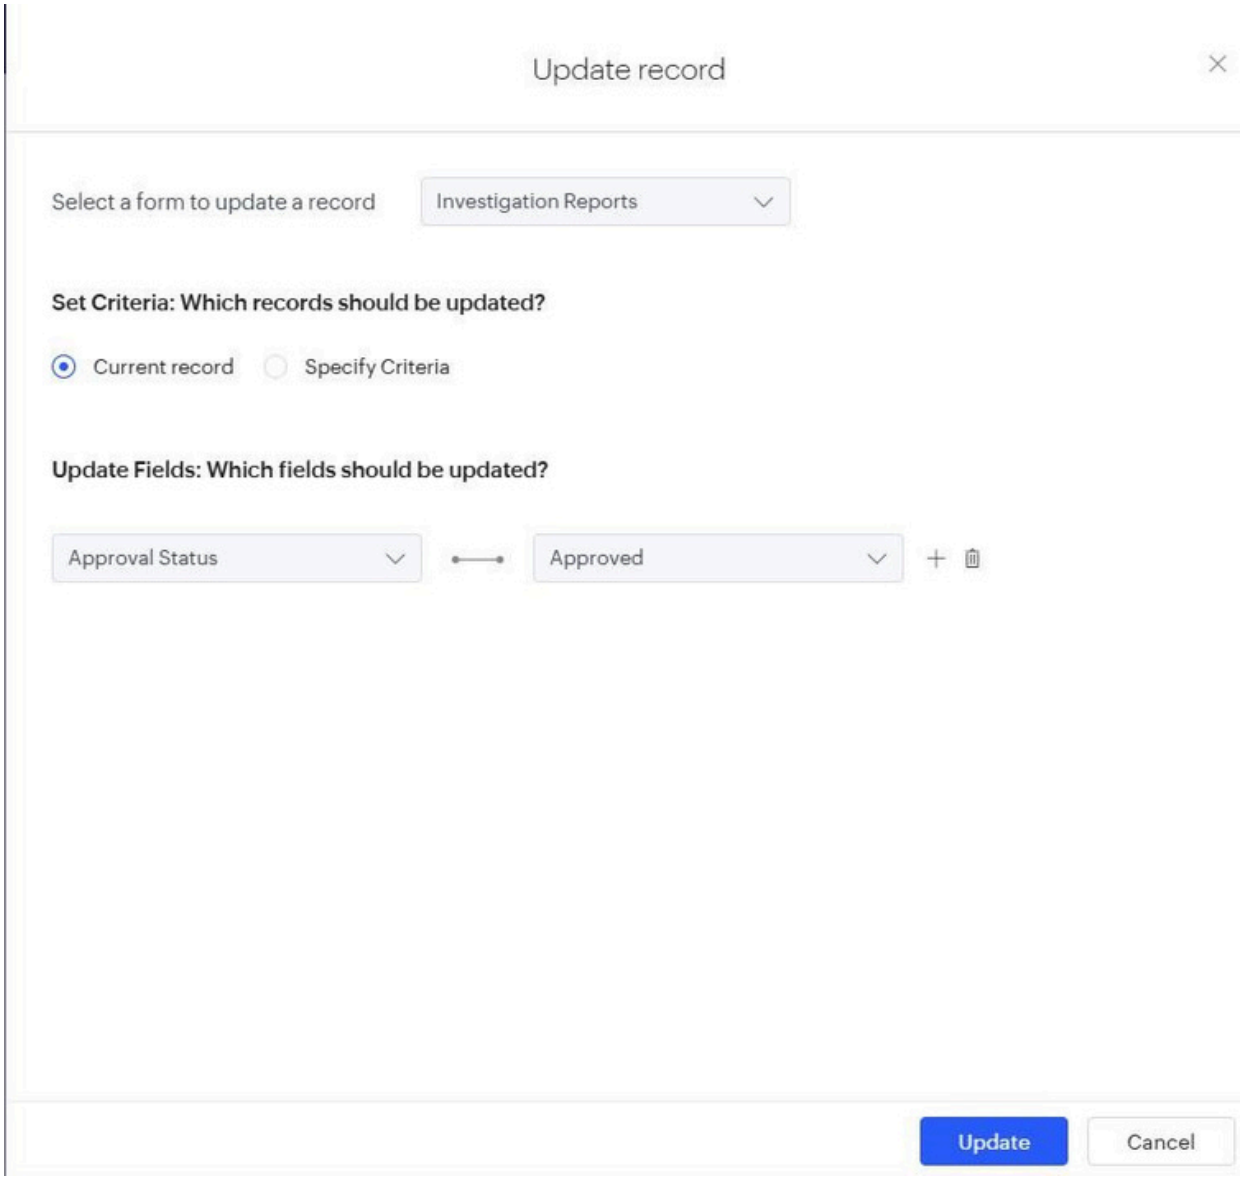

Procedure

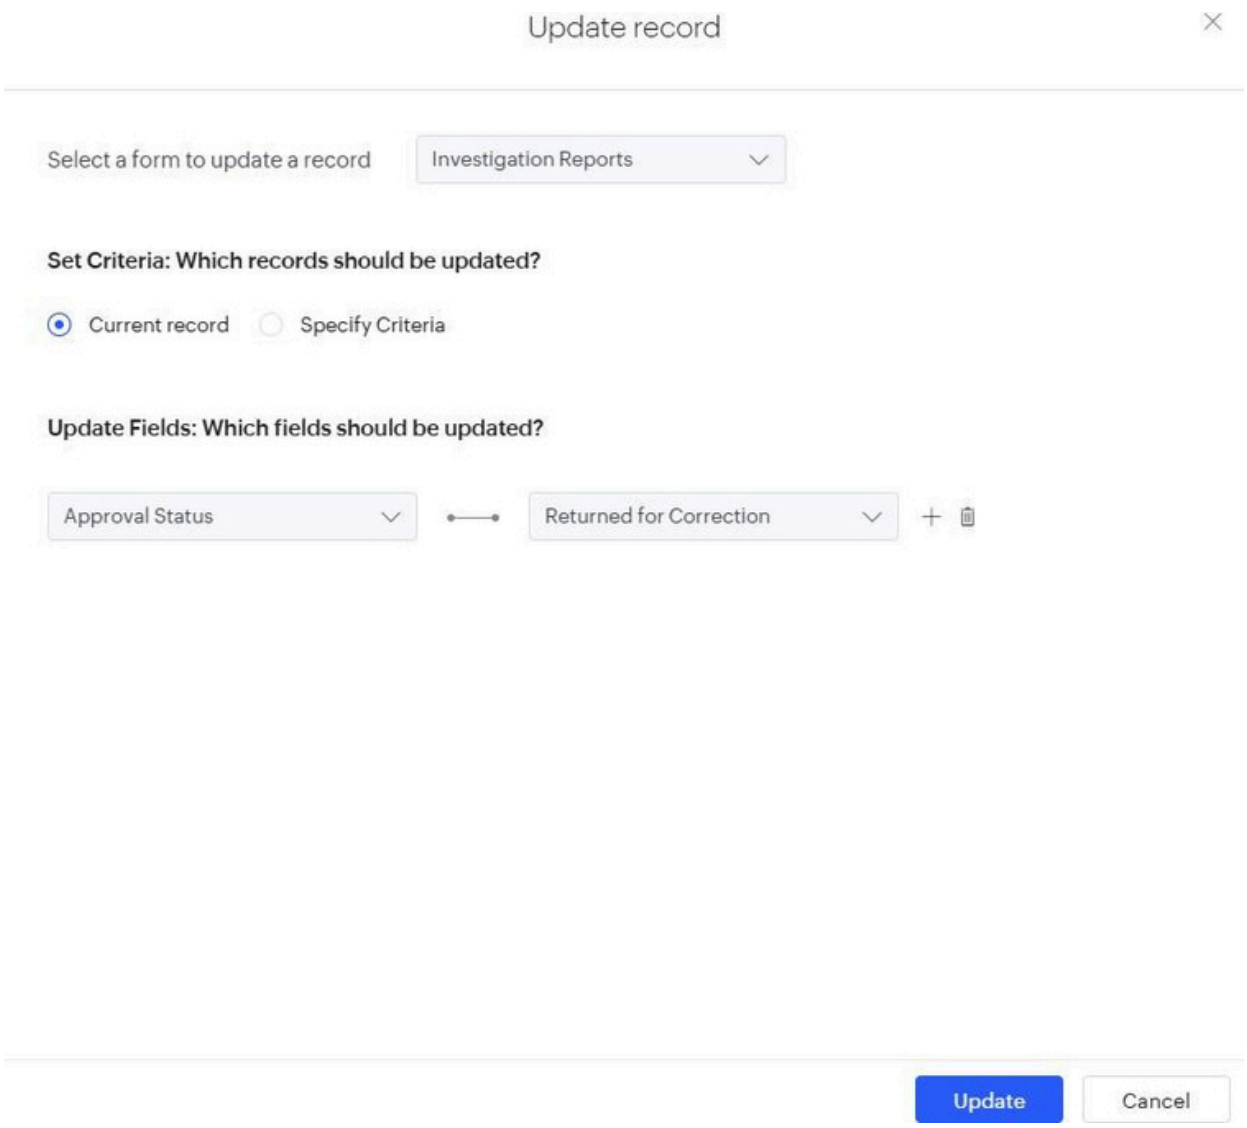

1. Open the EviTrace application in Zoho Creator.
2. Navigate to Workflow → Approvals.
3. Create an approval workflow named Investigation_Report_Approval for the Investigation Reports form.
4. Configure the workflow to trigger when an investigation report is submitted for review.
5. Assign the Auditor role as the approver.
6. Configure the approval actions to update the report status to Approved when accepted and Returned for Correction when rejected.
7. Enable the approval workflow.
8. Submit a test investigation report and verify that the approval request appears for the Auditor.
9. Test the approval and rejection process and verify the updated status.

Result

The Investigation_Report_Approval workflow was implemented to enable the Auditor to review investigation reports and approve or return them for correction.
